Antioch Lions Told

Americans Must Sell

Democracy to Europe

The American citizen is going to have more pro and less anti if he is to sell democracy to the rest of the world, Dr. Beryl D. Orris, psychiatrist and lecturer, told the Lions Club at Smart's Country House Monday evening.

President Ted Larson said Orris was the best speaker the club has had for several years in his field of learning.

Dr. Orris said that Americans are not selling themselves to Europeans who judge us through the movies, tourists, and the men in the armed forces.

"Movies give the impression we are all extremely wealthy and are reckless in our spending," said Orris. "Tourists away from home are braggarts and often show themselves up at their worst, and while the G. I. spreads good will, he often does harm."

Committees made reports on the proposal of a public swimming school and uniforms for the village band and the grade school band. In all three instances more time was asked through which more facts can be obtained to set forth the needs. The swimming pool committee will visit other places where pools have been constructed to get an idea as to costs and means of bearing the expense.

Dupre is the second Lake County man to receive this kind of injury in the same fashion.

Chicago Man Killed, Antioch Man Injured In Two-Car Collision

Accident Occurs at Blind Corner of Loon & Deep Lake Roads

Sidney H. Corenson, 54, of 753 E. 79th st., Chicago, was killed and Harold Heinz, R. F. D. 1, Antioch, was badly hurt in a collision of cars at Loon Lake and Deep Lake rds. southeast of the village Wednesday morning.

Corenson's car was said to have been hit broadside as it emerged on Loon Lake rd. at a blind corner going north by Heinz's car, which was traveling east.

Witnesses told Deputy Sheriff William Wood that Corenson's body "flew through the air like a sack of potatoes" when the cars collided and he landed in a corn field 60 feet from the point of impact.

Corenson was still alive when the police arrived but he was pronounced dead at 8:15 a. m. when he arrived at Victory Memorial hospital.

The Antioch Rescue squad took Heinz to Victory Memorial hospital where he was said to be suffering from a broken arm, a possible broken shoulder, and undetermined other injuries.

Merle Paul, State Director of the Illinois Savings Bonds Division. H Bond sales in the State were \$8,115,000 as compared to sales of \$4,147,500 in the same month last year. Local Police Start Drive to Enforce Vehicle Tax Laws

Residents of Antioch who own or operate automobiles or trucks are liable for arrest if they have not yet purchased a 1954-55 vehicle license, according to an advertisement in this issue of the Antioch News. The licensing period for this so called "wheel tax" is from May 1 to April 30, of each year, corresponding to the fiscal year of the village, thus persons who have not provided the stickers for their cars have been delinquent for almost 90 days.

Tickets will be issued to all local cars which do not display the windshield sticker, regardless of whether or not a license has been purchased, since the ordinance calls for display of the sticker as well as its purchase.

Your Kitchen—and Farm Machinery

The modern American kitchen is a miracle of labor-saving convenience. Electric ranges, refrigerators, washers and all manner of other appliances have transformed both the urban and rural home.

That kitchen, strange as the idea may seem, wouldn't be possible if it weren't for farm machinery—tractors and harvesters and all the rest!

Here's the reason. In this nation's early days, it took 85 farm workers to produce enough food for themselves and 15 others—now 15 farmers produce enough for themselves and 85 others. To come down to modern times, in the past 40 years farm output has doubled—while the number of manhours needed to achieve the enormous production has steadily declined. That means that vast armies of people have been able to take jobs in industry. They produce automobiles, stoves, TV sets and all the thousand and one other things that make for better living. To take one example, a modern combine saves in a single day enough manpower to manufacture a refrigerator. There would be only a comparative handful of people available to man the factories if we were still dependent on human and animal labor to do the jobs of the farm.

Farm output must be much greater still in the future—our soaring population makes that certain. And again machinery will make the task possible and at the same time leave plenty of workers for our other needs.

"Grew Some" Story

McGregor Smith, Chairman of the Board of the Florida Power & Light Company, recently told what he describes as a "grew some" story. It's an impressive story indeed. This company had 243,000 KW of plant capability at the end of 1945. It will have 740,000 next November. Its capitalization grew from \$91,000,000 at the end of 1945 to \$189,000,000 at the end of 1953, and is headed toward \$453,000,000 in 1961. Where it had 2,061 employees at the end of 1945, it had 4,358 when 1953 closed, and will need about 8,000 in 1961. Its rate of return has been comparatively uniform, and it has been able to pay fair dividends to the owner-stockholders who make its existence possible. Power rates are low.

Many factors have contributed to this remarkable record of growth. One of the important ones is the state public utility commission's approach to regulation—an approach which Mr. Smith called "the most fair and sensible I have ever known." Basically, the formula is a simple one. The Commission's general counsel has described it in these words: "The Florida Commission has never been greatly concerned over the rate of return. It has been much more interested in the dollar requirements of the utility. How many dollars does the utility require in order to meet its operating expenses, depreciation charges, taxes, maintenance expenses,

debt service, dividend requirements and transfer a reasonable amount to surplus?"

This policy has made it possible for the company to attract the new capital needed. And that, in turn, has made possible its growth and progress, which has worked to the benefit of all business and individuals in its territory. When we give enterprise a fair break and encourage it to go ahead we get striking results.

Dogs by the Billion!

This summer, as always, huge armies of Americans of all ages are flocking to baseball games, to beaches and lakes for picnics and sport, to amusement parks and carnivals, and are enjoying all manner of diversions. A very high proportion of them will have what might be termed an "expedient companion" in the form of that delicacy known as the hot dog.

During the 14-week period that began with Decoration Day and will end with Labor Day, says the American Meat Institute, the incredible total of 2,624,640,000 hot dogs, a string that would girdle the earth about 8 times, will be consumed in this country! That works out to 21 of the dogs for every man, woman and child between the ages of five and sixty.

The hot dog, obviously, is a true and lasting American institution. It's as indigenous as apple pie. To millions of us, there would be a sad lack in the best of ball games without a "red hot" or two and something cold to wash it down with. The hot dog stands are as much a part of carnivals as the rides and the sideshows and the barkers. And the hot dog is a key element in the home barbecue trend which has developed enormously in late years.

This season's consumption, incidentally, will be eight per cent over last's. The good old hot dog gets more popular all the time.

The Low Down From Hickory Grove

I like to gas about Free Enterprise and economy. With total Free Enterprise and the Socialist strain in our modern blood stream cauterized, or whatever you do to dry it up—and with horse sense type economy added—this land of the free would soon regain the ruggedness that built a great country—following 1776—of its wide prairies and deep forests. Horse sense type economy and private ownership have put us head and shoulders above other lands bogged down with socialism, master minded by the political gentry not able to do the job without nicking the tax payer. The gimmick is, we are going softie. Like the old gray mare, we are not what we used to be—but we are not sunk.

What we need is to dust off the old ruggedness we inherited from grandma and grandpa. They didn't sit around waiting for the raven to fly in with the groceries. They went out and got 'em.

And for being contented and happy—who is now? Grandma had two slabs of bacon on the shelf versus great granddaughter's one pound now, in our own brisk times. Hurry has dimmed our vision. A smooth gent appears on the scene. Give me your vote, dear people, he says, and I'll see to it that Sambo will take the hard knocks, and you all can lean back and rest. We lolled and listened—we now have a new day, March 15th—but not the most happy, like the man said—it's dismal.

Yours with the low down,

JO SERRA

Alaska, Hawaii Would Increase Nation One-Fifth

WASHINGTON—If Alaska and Hawaii are admitted to the Union as states, the country's size will be increased by one-fifth, the population will be boosted by some 600,000 persons and two more stars will be added to the flag.

The issue of admitting these two outlying territories has long been the basis for much discussion by political leaders who debated about admitting Hawaii first, then taking up Alaska next, or admitting both at the same time. In the past, states have been admitted singly, in pairs and even in larger groups.

The first state added after formation of the Nation was Vermont in 1791. It was followed by Kentucky more than a year later, and by Tennessee in 1796. From then until 1812 when Louisiana came in, only one state entered—Ohio in 1803.

One of the most troublesome problems arose over Maine and Missouri. During the James Monroe administration the sparks of sectional conflict had already kindled. Maine, an anti-slave state, was knocking at the door, but Southerners conditioned its entry on approval of Missouri's statehood aspirations. Missouri was considered safely pro-slavery.

The result was the famous Missouri Compromise of 1820. Maine was admitted March 15, 1820, Missouri a little more than a year later.

The greatest group entry occurred within nine days. Between November 2 and 11, 1890, North and South Dakota, Montana and Washington took their place in the Union. New Mexico and Arizona were the latest admissions, both in 1912.

Gold Diggers Dig To Sousa Refrain

LEAD, S.D.—The years have quieted shouts of "GOLD!" in the Black Hills and now it's music the people hear—the music of the Homestake Mining Company's Miner's Band.

The Homestake—which had its start when the word "gold" could mobilize a mob in minutes—is the largest gold mine in operation in the United States. But gold's not enough. While the miners are digging nearly 2,000,000 tons of ore a year, and annually setting off more than 4,000,000 sticks of dynamite, some of them are whistling Sousa marches from a Homestake band concert.

The band traditionally appears at the State Fair, Black Hills Roundup, Belle Fourche, Key City Rodeo, Slurgis; Gold Discovery Day, Custer, Days of '76, Deadwood, in addition to appearances in concert series and at local affairs in Lead.

Britain Expects Record

LONDON—A total of 233,000 Americans visited Britain in 1953, but this year in search of an intimate and leisurely view of the historic land, a quarter of a million visitors are anticipated.

Many will start off their trip in London with the traditionally famous sights: Buckingham Palace, home of the Royal Family; the Tower of London, with its violent history and its colorful "beefeater" guards; Westminster Abbey and the Houses of Parliament; and Piccadilly, one of the world's best-loved thoroughfares. London theatres will be running this year, with the best seats selling for \$2.45 or less.

Within a one-day excursion of London are the Shakespeare country and the Memorial Theatre, where the Bard's plays are given; Oxford and Cambridge, with their handsome buildings dating back to medieval times.

Over-Transfusion

ANN ARBOR, Mich.—"It is possible to over-transfuse a patient during surgery," Dr. Robert E. Berry of the University of Michigan recently told a medical group.

Blood transfusions during an operation are a necessary part of a balanced operating routine. But, said Dr. Berry, the anesthetized patient is a potential "trap for blood" especially during an operation that lasts several hours. Lacking the protective mechanism of activity, the patient may develop pulmonary complications and labored and rapid respiration.

Yet, he added, there is no need for anxiety. "We now know about over-transfusion, we guard against it, and we can recognize its signs."

Granddaughters Of Southern Spies Meet in New York

NEW YORK — Granddaughters of two of the most dangerous men of the Confederacy met for the first time at the New York Historical Society this year. It was ninety years ago that New York was nearly burned to the ground. Chicago was in panic, and several border states were almost won over to the Confederacy, due to the daring of two Southern agents and their associates.

Historical documents revealing some of the machinations of a Confederate spy ring were presented to the New York Historical Society by the granddaughters of the two leading spies, Mrs. John J. Wynn, Mt. Sterling, Ky., and Miss Mary Crane Hone, Morristown, N.J. gave the society documents which have never been out of their families since the Civil War.

The presentation marked the 90th anniversary of the Confederate plot to destroy New York. James D. Horan, author of the new book, "Confederate Agent," cooperated with Society officials in bringing Mrs. Wynn and Miss Hone together.

Captain Thomas H. Hines, C.S.A., was the mysterious master-mind of the Confederate plot, and before he was finished, he almost succeeded in getting Illinois, Indiana and Ohio to join the Confederacy; New York was in flames, Chicago near panic; Northern banks and army payrolls were robbed of millions; a secret army of 100,000 Northern Confederates were prepared to strike; and a Confederate fleet was moving up to burn the port cities of the Union.

Jets Get Energy From 'Highballs'

CINCINNATI—Water and alcohol "highballs" served to 141 jet engines powering the Air Force's Boeing B-47 bombers are providing the swift stratojets with extra power for takeoff.

Although not the conventional-type highball, a mixture of water and alcohol is injected into the combustion chambers of the engines as a spray. This process increases both the mass flow through the engines and the velocity of the jet gases thus providing greater thrust.

Water injection combined with a new external rocket arrangement has provided the 600-miles-per-hour bomber with a huge increase in available takeoff power. This additional power enables the bomber to operate from shorter fields or to lift maximum loads from existing runways.

The "highball" must be properly mixed, as too much or too little alcohol in the mixture will influence engine operation and result in reduced augmentation.

Now No Nutrias May Be Raised Sans Licenses

SACRAMENTO, California — You no longer can raise nutria in California without a license.

In case you didn't know, the nutria is a large rodent, the latest fur-farming wonder animal. Nutria farming is not new in the United States. According to the departments of agriculture and fish and game the first nutria was imported into this country by Will Flakes in 1899. He started with a male and three females at Elizabeth Lake, California.

The new state restrictions on nutria farming have sprung from concern by agriculturists and wildlife people over the increasing population of nutria in the state. During the last four years approximately 200 nutria farms have begun operations with up to 20 pairs of nutria. Several nutria associations and cooperatives are expanding activities in the state. The animals are being sold as breeding stock at prices ranging from \$400 to \$1,000 each.

Curfew Restrictions Not Thing of Past

WASHINGTON—Curfew restrictions, which go back at least to medieval times, are still a very live issue. As problems of juvenile delinquency mount, civic authorities from coast to coast are dusting off long unenforced regulations and considering new ones.

A Washington, D. C. commissioner has suggested a law that would keep children under 12 off the capital streets at night. Under an old curfew ordinance, a Los Angeles judge recently fined the parents of eight boys who ambushed and attacked a small group of adults.

Way of Life.

ROCKFORD, Ill.—Rockford College recently was named beneficiary of a \$64,000 estate with the provision that it use the income to purchase books "which do not conflict with the American way of life as it existed prior to March 4, 1953."

Patience
To know how to wait is the great

We've got an Important Following!

Men and women, young and not so young... all of them owners
of property—homes, cars, farms, factories, furnishings, equipment
and implements of many kinds.

Why are they following us?

Because they know that their possessions represent dollars; dollars
which may be lost today, tomorrow or next week to any of a number
of disasters.

And we're out in front with the very best of insurance advice,
service and protection!

Yes, ours is the calibre of insurance coverage that keeps our
clients worry-free, loss-free and right in step with their plans for a
future full of shiny new possessions and unimpeded prosperity.

It's the Hit that's
writing New History

TAKE a look, if you please, at the car and the styling that are changing historic sales standings.

Take a look at the beauty and the buy called Buick—the car that is forging ahead to new sales heights in the 1954 market.

Take a look at the new best seller that has moved into the "Big Three" of the nation's top sales leaders—into that very exclusive circle that for two decades has held only the so-called "low-price three."

For today, as national sales figures for the first five months reveal, Buick is outselling all other cars except two of these "low-

price three." And each month firms Buick's new position.

It takes solid worth to bring this about—a lot more automobile per dollar in Buick than in other cars.

But it also takes the glamorous new tomorrow styling that is Buick today. It takes the highest V8 horsepower, Series for Series, in all Buick history. It takes the room and comfort and ride and handling that are Buick's proud tradition.

And it takes a range of cars to satisfy a wide range of people—with prices that most people can well afford. So you find

the low-priced SPECIAL, the high-powered CENTURY, the extra-spacious SUPER, and the custom-built ROADMASTER—the four big reasons for Buick's tremendous sales success.

Come in for a demonstration and you'll see what we mean.

With the years-away styling of this glamor car, you'll be way ahead at resale time. And right now you're money ahead with the big trade-in allowance our volume sales can bring you. Drop in this week.

Festival Was a Success
The festival at St. Peter's church last weekend was highly successful. Six hundred and twenty-five beef dinners were served on Sunday afternoon by the men's and women's organizations. Profits from the two day event will be placed in a fund to provide a residence building for the nuns of St. Peter's school so that the quarters they now use in the school can be used for classrooms.

Sport Car Races Sunday
Sport Car races at Wilmet Hills course are expected to draw a big crowd Sunday. Some of the best drivers in the Middle West have entered. Traffic will be heavy through the village at noon just before the race and at the close.

The American Red Cross swimming classes will meet on Monday and Tuesday, Aug. 2 and 3, to make up to the two days missed.

Grade School Pupils at Grass Lake Pen Poems

Grass Lake fifth and sixth grade pupils turned to rhyme before school closed last spring, but the poems are still appropriate. They are:

Summer Time
You'll have time on your hands. Because summer is here. You'll laugh and play. And be full of cheer.

There's plenty of sunshine. To make gardens grow. Then the fly will return. And warm winds will blow.

To the beach you will go. And play in the sand. In the water you'll swim. For there's heat on the land.
—Sandy Waldweller, 5th Grade.

Children in Summer Time
In the summer children have fun. They play, romp, and run. Children never mind the heat. At various pranks they can't be beat.

When swimming they think water's fine. But at bath time, how they repine. In the sand their toes they love to wiggle. And oh how that does make them giggle.

When going to play they fairly fly. And sneak out of the house very sly. Time on your hands when sunshine is bright. Children just laugh to their heart's delight.
—Sharon Bauer, 6th Grade

Summer Fun
In the summer the children swing. And hang their clothes on a hickory limb. They laugh and splash around in the water. And play on the grass near the teeter totter.

As I lie in the sunshine on the sand I saw a little fly upon my hand. And think of how lazy one fly can be. And yet of all the trouble he causes me.

In the night while you try to sleep. The temperature will just creep and creep. And then you wonder why oh why. You ever longed for hot July.
—Patsy Byrne, 6th Grade

Despite 3 Circuit Hits Antioch Moose Lose to Woodstock at Crystal L.
Despite heavy hitting on the part of the Antioch Moose the local team

lost a heart-breaker 10-inning game to Woodstock at Spring Grove Monday evening 9 to 8 in the Chain O' Lakes league.

Dick Stroner of Antioch hit two home runs, a triple and a single for a perfect day at bat, and George Sterbenz, too, hit a home run, but despite these the Moose lost.

On July 19 Antioch lost to Spring Grove 3 to 5, and July 21 Antioch beat Ringwood 13 to 5. With four victories and five losses Antioch dropped to fourth place Monday.

The season will end next week with games against Woodstock and Wauconda.

The Antioch team has been invited to play an exhibition game at Racine next month.

Wednesday night's game was rained out.

Antioch still has a mathematical chance of winning the league championship. Spring Grove, Woodstock, and Wauconda are still on the list to be played and if all of those games can be won while the others are losing, Antioch can be the victor.

The standing at present is:

Team	Won	Lost	Pct.
Spring Grove	6	2	.750
Woodstock	6	4	.600
Wauconda	4	4	.500
Antioch Moose	4	5	.444
Ringwood	3	8	.375

GRIP THE WHEEL FIRMLY FOR SAFETY

Have you noticed the grip that you take on the wheel of your car? Do you use both hands or only one? If only one or you hold it lightly with both hands, you'll be smart to change this habit quickly. Otherwise a sudden blowout of a tire or need to turn your car quickly may find you totally unprepared. Grip the wheel of your car firmly not tensely — be ready for such an emergency.

Adding Zest
If the flavor of a salad made from left-overs is dull, you can add a little lemon juice if it's a fruit salad, or a dash of relish or snappy cheese if it's a meat or vegetable salad.
